To whom it may concern,

My aspiration is to build a career in the financial industry. Currently, I am seeking a position as a Quantitative Financial Analyst where my education, expertise and energy can be further utilized.

As you will observe from my resume, I hold a Master's of Science in Finance and a Bachelor's in Shipping Investment and Finance ie. Supply Chain, Commodities and World Trade. During my studies, I had also the opportunity to apply the Engineering of Electronics and develop the essential knowledge of the diverse subjects, which comprise the Financial Ecosystem, all of which tended to reinforce and solidify my life-long interest in Global Capital Markets and my commitment to bond the Trust of the Exchange.

You will see that along with my academic preparation, my past work experience has provided me with the knowledge and versatility to successfully meet the challenges of various situations in a high-pressured environment, dealing with a range of high priority issues. Valued as a decision-making professional, I excel at managing complex financial planning and analysis initiatives by providing ad-hoc analysis, financial modeling and reporting to support forecast and budget processes. My successes in the past stem from my work ethic, my desire for progression and my loyalty to the vision through collaboration and mutual effort in a multicultural environment.

In conclusion, I hope you will be persuaded of my potential to strongly perform and make a real contribution as a member of your team. I would greatly appreciate the opportunity to discuss additional information on my candidacy further in depth.

Thank you in advance for your time and consideration.

Sincerely yours,

Panagiotis Mouzoukos
